Executive summary

Pursuing Bachelor's in Computer Science with skills in JavaScript, React, Python and Databases. Built web applications with clean, efficient code and applied data-driven problem-solving. Seeking SDE/Data Science roles to develop scalable, user-focused solutions.

Education

Sathyabama Institute of Science & Technology, Chennai *August 2023 - Present*
Bachelor of Technology CSE (majoring in Software Engineering) ***CGPA: 7.8/10***

Project Work:

Campus EventHub – Unified Smart Event Orchestration Platform:

- Inter-college event management lacked a centralized system, causing inefficiencies, data inconsistencies, and poor user experience.
- As a Frontend Developer, built responsive interfaces for event creation, registration, and management, implementing end-to-end workflows and REST API integration.
- Improved page load time by ~35%, reduced registration errors by ~40%, and increased user engagement by ~30% through optimized UI and validation.
- Delivered a scalable platform supporting 500+ users with smooth navigation and real-time updates, enhancing efficiency and accuracy.

Skills:

Programming: C, Python, Java
Frontend: React.js, HTML, CSS
Databases: SQL, MySQL Server
Concepts: Data Structures & Algorithms, Object-Oriented Programming
Tools & OS: Windows

Certifications & Achievements:

Introduction to Cloud **– IBM Cognitive Class**
Machine Learning with Python **– IBM Cognitive Class**
AI & Machine Learning **- Edunet**
